At times, specific certain periods may not be available. Check with your financial professional for available certain periods at the time of purchase.

## Optional benefits

Immediate annuities from Protective offer optional benefits, where available, to enhance flexibility with your retirement income strategy.

### PAYPlus option

This option provides annual annuity income payment increases that compound on the anniversary of your first annuity income payment. Annual increases of up to 10% of the prior year's annuity income payment are available.

This option may only be selected at the time of purchase and may not be selected if the commutable value option, described below, is selected.

### Commutable value option

Available with certain period payment contracts, this option enables you to fully surrender your annuity and receive a percentage of your adjusted investment. If you exercise the commutable value option, your annuity income payments stop, so it should be used only in the event of an emergency or if your financial situation has changed significantly since you purchased the annuity.

Please note that you may receive less than your invested amount if you choose to exercise the commutable value option. The commutable value is calculated based on the income year in which you exercise the option and the length of your certain period contract, as illustrated below.

Portion of adjusted investment to be returned (adjusted for prior annuity payments that have been made)			
Income year in which commutable value option is exercised	Less than 12 years certain period	13–16 year certain period	17–30 year certain period
1 to 3	80%	80%	80%
4	100%	80%	80%
5	100%	100%	80%
6 or more	100%	100%	100%

This option may only be selected at the time of purchase and may not be selected if the PAYPlus Option, described above, is selected. Not available in all states.

The PAYPlus option and the commutable value option may not be available in all states. Please check with your financial professional for exact availability.
