

Protect your investment without sacrificing growth

The prospect of having both safety and growth may seem impossible, especially when today’s markets are so uncertain. However, growth potential doesn’t necessarily require additional risk. **Protective Asset Builder II** offers the growth potential you are looking for with the protection from market downturns you need to confidently prepare for retirement.

Review the facts

- **Optimize Growth Potential** with diverse index-linked crediting methods that include participation rate, cap and trigger strategies.
- **Link Performance to Index Options** with the well-known S&P 500® Index.
- **Lock-in Gains and Avoid Losses** to protect your contract value even if index performance is negative.

Create a protected growth strategy

To help you achieve your growth goals, you can allocate your investment to a choice of interest crediting strategies. In addition to a fixed interest crediting strategy, Protective Asset Builder II has three categories of point-to-point crediting strategies, which are described below:

These charts are hypothetical and intended solely to demonstrate the different interest crediting options. The charts are not indicative of the performance of any indexed annuity. Actual index performance will vary.

All non-guaranteed components of the indexing formula may change and could be different in the future. Indexed interest could be less than that earned in a traditional fixed annuity and could be zero. For product details, benefits, limitations and exclusions, please consult the contract, product guide and disclosure statement. These documents describe the terms and conditions that control the insurance company's contractual obligations.

Annuities are long-term insurance contracts intended for retirement planning.
